

## Content

<b>Preface</b> .....	v
<b>1. Ground-Based Microwave Radiometry to Characterize Atmospheric Attenuation Affecting Earth-Space Links</b> .....	1
<i>Marianna Biscarini, Lorenzo Luini</i>	
<b>2. Ground-based and space-based GNSS receivers for atmospheric parameter retrievals</b> .....	13
<i>Stefania Bonafoni, Nazzeno Pierdicca</i>	
<b>3. 40 Years of Research in Microwave Radiometry for monitoring natural surfaces</b> .....	23
<i>Paolo Pampaloni, Simonetta Paloscia, Emanuele Santi</i>	
<b>4. Microwave Radiometry of Land Surfaces</b> .....	39
<i>Cristina Vittucci</i>	
<b>5. High-Resolution Soil Moisture Monitoring: Using Resources and Overcoming Challenges with SAR Systems</b> .....	67
<i>Francesco Mattia</i>	
<b>6. Coastal waterline detection from satellite Synthetic Aperture Radar imagery: an overview</b> .....	83
<i>A. Buono, G. Inserra, S. Cappa, F. Nunziata, M. Migliaccio</i>	
<b>7. Spaceborne Earth Observation and food production: not just Precision Agriculture</b> .....	105
<i>David Marzi, Cristian Garau, Fabio Dell'Acqua</i>	
<b>8. Semantic segmentation and heterogeneous change detection with SAR imagery</b> .....	127
<i>Ignacio Masari, Martina Pastorino, Gabriele Moser, Sebastiano B. Serpico</i>	
<b>9. SIASGE temporal sequence harmonization</b> .....	141
<i>A. Sorriso, F. Dell'Acqua, P. Gamba</i>	
<b>10. Natural and anthropogenic hazards affecting infrastructures: the role of satellite SAR Interferometry</b> .....	161
<i>S. Stramondo, S. Atzori, M. Albano, L. Beccaro, C. Bignami, V. Rosato, C. Tolomei</i>
