Content

Preface v

1. **Ground-Based Microwave Radiometry to Characterize Atmospheric Attenuation Affecting Earth-Space Links** 1
   Marianna Biscarini, Lorenzo Luini

2. **Ground-based and space-based GNSS receivers for atmospheric parameter retrievals** 13
   Stefania Bonafoni, Nazzareno Pierdicca

3. **40 Years of Research in Microwave Radiometry for monitoring natural surfaces** 23
   Paolo Pampaloni, Simonetta Paloscia, Emanuele Santi

4. **Microwave Radiometry of Land Surfaces** 39
   Cristina Vittucci

5. **High-Resolution Soil Moisture Monitoring: Using Resources and Overcoming Challenges with SAR Systems** 67
   Francesco Mattia

6. **Coastal waterline detection from satellite Synthetic Aperture Radar imagery: an overview** 83
   A. Buono, G. Inserra, S. Cappa, F. Nunziata, M. Migliaccio

7. **Spaceborne Earth Observation and food production: not just Precision Agriculture** 105
   David Marzi, Cristian Garau, Fabio Dell'Acqua

8. **Semantic segmentation and heterogeneous change detection with SAR imagery** 127
   Ignacio Masari, Martina Pastorino, Gabriele Moser, Sebastiano B. Serpico

9. **SIASGE temporal sequence harmonization** 141
   A. Sorriso, F. Dell'Acqua, P. Gamba

10. **Natural and anthropogenic hazards affecting infrastructures: the role of satellite SAR Interferometry** 161
    S. Stramondo, S. Atzori, M. Albano, L. Beccaro, C. Bignami, V. Rosato, C. Tolomei
