Content

Preface v

1. **Assessing Power Amplifier Distortions on Radar Waveforms for Spectral Coexistence** 1
   Augusto Aubry, Vincenzo Carotenuto, Antonio De Maio, Alfonso Farina, Alessio Izzo, Rosario Schiano Lo Moriello

2. **Radar Clutter as a Communications-Enabling Ambient Signal** 17
   Emanuele Grossi, Marco Lops, Luca Venturino

3. **OFDM Radar Based on Communication Signals of Opportunity** 31
   P. Lombardo, F. Colone, C. Bongioanni, F. Filippini, G. P. Blasone, M. Di Seglio, J. Trujillo Rodriguez

4. **A mitigation approach for Radio Frequency Interferences corrupting airborne FMCW SAR data** 71
   A. Di Vincenzo, A. Natale, A. De Maio, P. Berardino, C. Esposito, R. Lanari, S.Perna

5. **Continuous-Emission Noise Radars: a Tool for an Efficient and Secure Use of the Electromagnetic Spectrum** 91
   Gaspare Galati, Gabriele Pavan, Christoph Wasserzier

6. **Sequential Convex Approximation based MIMO Radar Beampattern Design with Multi-Spectral Constraints** 115
   Guolong Cui, Xianxiang Yu, Hui Qiu, Jing Yang, and Lingjiang Kong

7. **Waveform Design in MIMO Radars for Range-ISL Minimization and Spectral Compatibility** 139
   Ehsan Raei, Mohammad Alaee-Kerharoodi

8. **Assessment of UAV-Based ISAC SAR Imaging: Techniques and Performance Evaluation** 153
   Marco Manzoni, Francesco Linsalata, Stefano Moro, Stefano Tebaldini
