# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Overview and Motivation . . . . .	2
1.2	Aims and Goals . . . . .	8
1.3	Layout of the Thesis . . . . .	8
1.4	Scientific Contributions Achieved by this Work . . . . .	9
<b>I</b>	<b>Background and Theoretical Investigations</b>	<b>11</b>
<b>2</b>	<b>Background</b>	<b>13</b>
2.1	Basic Radar Processing . . . . .	13
2.2	Introduction to Radar Waveforms . . . . .	20
<b>3</b>	<b>Moving Platform Issues in Noise Radar Technology</b>	<b>37</b>
3.1	The Doppler Tolerance in Continuous Emission Noise Radar . . . . .	38
3.2	Common Doppler Compensation Techniques . . . . .	59
3.3	Range-Doppler Migration in Noise Radar . . . . .	66
3.4	Clutter Suppression in Noise Radar on Moving Platforms . . . . .	68
3.5	Chapter Summary . . . . .	73
<b>4</b>	<b>Advanced Range-Doppler Processing</b>	<b>75</b>
4.1	Introduction . . . . .	75
4.2	Prerequisites of the Range Filter Bank . . . . .	76
4.3	The Range Filter Bank (RFB) Algorithm . . . . .	98
4.4	Chapter Summary . . . . .	112

---

<b>II</b>	<b>Experimental Investigations</b>	<b>115</b>
<b>5</b>	<b>The Noise Radar Demonstrator</b>	<b>117</b>
5.1	General Functionality of CE Noise Radars . . . . .	117
5.2	High Level Description of the Noise Radar Demonstrator . . . . .	120
5.3	The Demonstrator Development Procedure . . . . .	125
5.4	Digital Back End . . . . .	128
5.5	Analog Front End . . . . .	159
5.6	Chapter Summary . . . . .	174
<b>6</b>	<b>Static Tests for Noise Radar Verification</b>	<b>177</b>
6.1	System-Level Laboratory Experiment . . . . .	178
6.2	Stationary Field Tests . . . . .	181
6.3	Chapter Summary . . . . .	198
<b>7</b>	<b>Moving Target Detection Experiments</b>	<b>199</b>
7.1	Demonstrator Setup for MTD Experiments . . . . .	200
7.2	Experimental Range Filter Bank Verification . . . . .	202
7.3	General Applicability of the RFB on ISAR Imaging . . . . .	209
7.4	Interference Rejection Experiment . . . . .	211
7.5	Chapter Summary . . . . .	214
<b>8</b>	<b>Noise Radar Experiments on a Moving Platform</b>	<b>215</b>
8.1	Aim of the Experiments . . . . .	215
8.2	Demonstrator Setup and Antenna Configuration . . . . .	216
8.3	Experiments in Static Scene . . . . .	224
8.4	Dynamic Scene Measured from a Moving Platform . . . . .	238
8.5	Non-Cooperative Measurements at Larger Distance . . . . .	245
8.6	Conclusions and Outlook . . . . .	252
<b>III</b>	<b>Discussion</b>	<b>253</b>
<b>9</b>	<b>Discussion</b>	<b>255</b>
9.1	Comparison between RFB and cross-ambiguity function . . . . .	255
9.2	Real-Time Implementation Strategy for the RFB . . . . .	265
<b>10</b>	<b>Conclusions</b>	<b>269</b>
10.1	Summary . . . . .	269

---

10.2 Potential Applications . . . . .	270
10.3 Outlook and Future Work . . . . .	271
<b>Appendix</b>	<b>275</b>
<b>A Doppler Tolerance of Gaussian Windowed Noise Segments</b>	<b>275</b>
<b>B Further Information on the Demonstrator System</b>	<b>279</b>
B.1 Nyquist Band Sampling . . . . .	279
B.2 Data Representations in the Demonstrator . . . . .	285
<b>C Detailed Cost Comparison</b>	<b>287</b>
C.1 Formal Superiority of RFB against direct computation of the CAF . . . . .	287
C.2 Formal Superiority of RFB against CAF Variant A . . . . .	288
C.3 Formal Superiority of RFB against CAF Variant B . . . . .	289
C.4 Formal Superiority of RFB against CAF Variant B, both factorized . . . . .	289
